

Team Contract

Please complete the following sections and print the document so that each team member can sign it. If printing is too complicated, digital signatures will suffice.

Project Idea

We would like to use images of boar damage to land to train the image recognition on the drone; so that the drone can scan a specific area of land and detect/determine boar proximity.

We have a backup idea for the raspberry pi; a handheld program that uses image recognition to 'collect' animals into a catalog that can be viewed by the user. For example, a user can go to the zoo and leave with a catalog full of animals.

Meeting Times

Our primary meeting time is lab time, but if needed, we will use a when2meet survey to find supplemental meeting times.

Absences/Tardies

If a member misses two meetings in a row without warning, we will require presence at the following meeting ~~or we hit them with a stick~~ or report their absence to the instructors if it continues.

Communication

Our communication will be within text message, in a group chat.

Participation

We would consider a team member to be non-participating if they have not started work on their code, ignores messages, and skips meetings/labs consistently. If 2/3 of these are true, the group will message them about the issue, and for all 3, we would speak to the professor.

Agreement

By signing this document, I agree to put forth the necessary effort to complete my assigned portions of the team project. I agree to attend the weekly team meetings, attend ALL team meetings with Dr. Wagner, and communicate regularly with my team using the tools we agreed upon.
